

Network Engineer Position

Skills: OSPF, EIGRP, BGP, MPLS, DWDM, IPv6, Firewall ACLs and NAT, Network monitoring, Linux, Windows, VMware, extensive troubleshooting skills

Job Description:

Arsalon Technologies is the Kansas City area market leader for providing Internet hosting solutions to business. With our rapid growth Arsalon Technologies is looking for experienced Network Engineers to support the continuing demand for our Co-Location and Managed Services.

This position will provide operational network support to implement, monitor and maintain the network environment to meet and exceed the SLA requirements of the company as well as develop industry best practices and procedures for operation of a multi data center environment.

Responsibilities and duties include:

- Support implementation of Arsalon's growing network infrastructure
- Establish and maintain carrier relationships with multiple vendors
- Lifecycle management of network device inventory and spares
- Deployment of scalable network designs, solutions, policies, and recommendations by working with the team of network engineers or with a client
- Assist clients with technical and troubleshooting issues
- Assist with deployment and maintenance of diverse client systems including Windows, Linux, and VMware
- Participate in on-call, 24/7, to respond immediately to any system failures, within a rotating schedule

Organizational Considerations: Candidates must have the ability to prioritize projects and/or tasks. This position requires some work to be performed after business hours. On-Call is required on a rotational basis. In the case of outages, the candidate must be able to work alone or within a team environment until the problem is resolved. These events may or may not be during the normally scheduled on-call duty.

REQUIREMENTS Qualifications and requirements include:

- 4 year college degree or equivalent work experience
- Prefer 2 - 5 years IT experience
- Knowledge of various routers, switches and firewalls (Cisco, Brocade, Juniper)
- Experience with BGP and MPLS design and implementation
- Management of carrier relationships
- CCNA, CCNP, or equivalent a plus
- Knowledge of Windows Server and Linux operating systems
- Knowledge of VMware a plus
- Ability to handle stressful situations and keep level head
- Availability for Immediate work

Travel Required: Limited, to our data centers in other markets as needed (Dallas and Minneapolis)

Telecommute: No
