

Arsalon Network Operator Position

Job Description:

Immediate openings for entry-level Network Operators. This position is primarily responsible for monitoring data center network systems and infrastructure. Flexible hours are required. All shifts are available. Candidate must be able to work full time. Qualified applicants will have some Windows and Linux experience. The right candidate must also have excellent customer service skills with the ability to support end-users over the phone.

Responsibilities:

- Monitoring of client production systems.
- First level support for client issues.
- Provide secure escort access to data center.
- General data center monitoring and operations.
- Monitor and perform data backup operations.
- Perform other duties as assigned.

Qualifications:

- Experience with Windows, Unix and Linux utilities and basic networking skills.
- Incident and problem management skills.
- Written, oral communication and customer support skills.
- Must be able to multi-task as well as work independently.
- Must be flexible yet reliable and prompt.
- Ability to work alone.

Compensation:

- \$12 to \$15 per hour.

To apply for this position, please e-mail your resume to hr@arsalon.net or fax to 913-339-6702. NO phone inquiries, please.
